### DETAILED ACTION

Claims 1-22 are pending.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Any claim not specifically recited is rejected as it is dependent on a rejected claim and shares the same indefiniteness.

1. Recitation of "hydroxyazaspiroones" in claims 1 and 10 renders these claims and their dependent claims indefinite as the process recited leads to only one hydroxy compound. It is not clear what is intended. Replacement of "hydroxyspiroones" with "hydroxyspiroone" is suggested.
2. Recitation of  $M^+$  as an alkaline earth cation in claim 1 renders claim 1 and its dependent claims 2-9 indefinite as the valence requirement of the alkaline earth cation is not met with. It is not clear what is appended to the second valence of the alkaline earth cation.
3. The definition of  $M^+$  in the independent claim 10 remains unknown and hence renders this claim and its dependent claims indefinite.

#### ***Allowable Subject Matter***

Claims 1-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. These

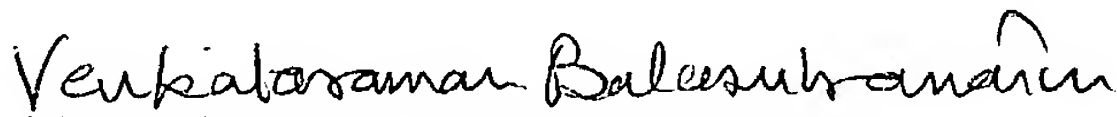

Art Unit: 1624

claims are allowable because prior art search in the related area did not teach or suggest the process of the instant claims, particularly use of molecular oxygen for hydroxylation.
